

**SRS** **RED ANGUS**

**2024** **BULL SALE**

**Wednesday, April 24, 2024 | 12:30pm**  
**Sterling Livestock Commission**

**69 TWO YEAR OLD**  
**REGISTERED RED ANGUS BULLS**

**35 YEARLING**  
**COMMERCIAL RED ANGUS HEIFERS**

## *Greetings Cattle Producers,*

Once again, we are excited to bring you one of the largest selections of two-year-old registered Red Angus bulls. As always, we thank you for investing in our aged-advantaged registered bull herd. These bulls can cover your cows in even the harshest environments. Our bulls will complement any herd in this area and beyond.

We continue to develop our bulls with you in mind. This year, they were summered on grass and mineral in southeastern Colorado until December 1st. At that time, we brought them to our new location in northeastern Colorado to our grow yard where they were fed on our grow ration. Though our home location has changed, we still offer the same great quality and reliability.

Our herd sires and cows are hand-selected with calving ease and herd quality in mind while maintaining profit-making carcass traits. Their genetics will stand up against the top Red Angus producers.

Each year we keep improving our bulls and this year is no different. This is our best offering of bulls yet. We are confident you will be as impressed with them as we are.

We look forward to discussing any of our bulls with you and helping you in any way we can!

All 35 head of yearling commercial Red Angus heifers we are selling are open and bangs vaccinated.

Sincerely,

*SRS Red Angus*

David Stavely  
719-892-0377

Shawn Randel  
719-688-1711

Charles Stavely  
719-892-0226

### *Sale Location*

**Sterling Livestock Commission**  
970-522-1950  
20197 Riverside Drive  
Sterling, CO 80751

Preregister at least 48 hours in advance to bid online at either **[www.dvauction.com](http://www.dvauction.com)** or **[www.cattleusa.com](http://www.cattleusa.com)**

### *Veterinarian*

**Paul Chard, DVM**  
970-842-0274

### *Transportation*

Complimentary delivery to locations within 300 miles of Akron, Colorado.

### *Liability*

Owners, their agents, sales management, or any of the sale staff will not be responsible for any personal injury, loss, or accident while attending this sale.

### *Settlement*

All bulls must be paid for no later than the end of the first working day after the sale.

## *SRS Red Angus Guarantee*

All bulls have passed a fertility soundness exam and have tested negative for trich and BVD unless indicated on the sale block. All bulls are guaranteed breeding sound at the time of sale.

All bulls selling for \$4,000 or more are guaranteed against breeding injury for the first breeding season. The breeding season is defined as the 90 day period following the first turn out of the bull(s). Credit will be given for 1/2 of the purchase price less salvage value of the injured bull in the following year's sale. Please notify us as soon as possible should an injury occur to make your claim and arrange your return of the injured bull. Broken bones or injuries due to negligence will not be covered under this guarantee. A bull that dies will not be covered by this guarantee.

We highly recommend the purchase of livestock mortality insurance to mitigate this type of loss and we will pay for one half of the first year's premium to insure the bull(s) up to their purchase price.

# RED ANGUS GUIDE TO EPDS

RedAngus.org

**ProS** ..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB** ..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM** ..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED** ..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW** ..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW** ..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW** ..... Yearling Weight predicts differences in 365-day yearling weight.  
(Pounds/High Value)

**ADG** ..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI** ..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK** ..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME** ..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG** ..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding.  
(Percent/High Value)

**CEM** ..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY** ..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB** ..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG** ..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW** ..... Carcass Weight predicts differences in actual hot carcass weight.  
(Pounds/High Value)

**REA** ..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT** ..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

A yellow tag with a curved top edge, centered on a light blue textured background. The tag contains the text "HERD SIRES" in red, bold, uppercase letters.
